TITLE: LAWN SPRINKLER NOZZLE PROVIDED WITH MEANS TO ADJUST SPRAY  
ANGLE THEREOF

PRELIMINARY AMENDMENT

Commissioner for Patents  
P. O. Box 1450  
Alexandria, VA 22313-1450  
Sir:

In conjunction with the filing of the present application, and prior to an initial Official Action on this matter, please amend the above-identified application as follows:

Preliminary Amendment: SPECIFICATION AMENDMENTS

In Paragraph [0002], please amend the paragraph as follows:

The conventional lawn sprinkler nozzle is generally provided with a structure enabling the nozzle to spray in various patterns at a fixed angle. Such a conventional lawn sprinkler nozzle as described above is therefore limited in function ~~in that~~ because it is incapable of cost-effective irrigation in terms of water consumption.

In Paragraph [0007], please amend the paragraph as follows:

FIG. 2 shows an exploded perspective view of the preferred embodiment of the present invention.

In Paragraph [0008], please amend the paragraph as follows:

FIG. 3 shows a longitudinal sectional view of the preferred embodiment of the present invention ~~in combination~~.

IN THE ABSTRACT

On page 9, please amend the Abstract as follows:

A lawn sprinkler ~~comprises~~ includes a connection pipe, and a spray angle adjustment structure mounted at one end of the connection pipe and formed of a circular distribution member, an adjustment member and a control member. The control member is actuated to turn by the adjustment member such that one or more of a series of arcuate rims of the control member block one or more of a series of arcuate through holes of the circular distribution member, thereby resulting in the sprinkling of water in various patterns.
